Gross Description:

1.) The specimen is received fresh for frozen section and is labeled "right thyroid lobe". It consists of a thyroid lobe measuring 4.5 x 2.5 x 1.8 cm and weighing 10.2 g. The surface is smooth and glistening. The lobe is inked black posterior and blue anterior. Serial sectioning reveals a well-circumscribed, tan-white nodule with a thin capsule measuring 1.8 x 1.8 x 1.7 cm. Portions of the nodule are submitted for frozen section and for TPS. The remainder of the specimen is entirely submitted.

Summary of sections:

FSC - frozen section control

N - nodule
