PROCEDURE

Right thyroid lobectomy.

SPECIMEN:

- A. Right lobe of thyroid. - Frozen section.
- B. Left lobe of thyroid.

HISTORY

Thyroid nodule.

GROSS

A. Received fresh for frozen section diagnosis in a container labeled "right lobe of thyroid" is a thyroid lobe (6.5 x 4.5 x 3.8 cm, 52 g). The lobe has a 4.5 cm in greatest dimension discrete nodule with a uniform firm tan-red cut surface adjacent to a 2.8 cm in diameter nodule with a 1-3 mm thick fibrous wall, spongy brown tissue at the periphery and a 1.6 cm in diameter eccentric cyst containing old brown blood. Compressed thyroid parenchyma at the periphery of the lobe has a uniform red-brown cut surface. Smears are prepared. A representative section of the cystic lesion is submitted for the

Ink code:

Blue - isthmus margin
Black - lobe margin

- FS1. Frozen section control smaller cystic lesion.
- FS2. Frozen section control larger solid tumor mass.

- 1-8. Cystic nodule with nearest margins.
- 9-12. Representative sections from large solid nodule with margin.

B. Received in formalin in a container labeled "left lobe of thyroid" is a lobe of thyroid (4.5 x 2.3 x 1.1 cm, 5 g). The red-brown parenchyma has two firm tan and gray nodules up to 0.8 cm in diameter with ill-defined borders. The margins are marked with black ink. The specimen is serially sectioned and submitted in its entirety in four cassettes.

FROZEN SECTION DIAGNOSIS

A. Suspicious for papillary thyroid carcinoma.

MICROSCOPIC

See diagnosis.

DIAGNOSIS

A. Right lobe of thyroid, right thyroidectomy (52 g):
Papillary thyroid carcinoma (see comment).

B. Left lobe of thyroid, left thyroidectomy (5 g):
Papillary thyroid carcinoma (see comment).

COMMENT

THYROID CARCINOMA SUMMARY:

PROCEDURE: Total thyroidectomy.

SPECIMEN INTEGRITY: The specimen is submitted in two parts: right thyroid lobe (part A) and left thyroid lobe (part B).

SPECIMEN SIZE: 6.5 x 4.5 x 3.8 cm, 52 g; part A; 4.5 x 2.3 x 1.1 cm, 5 g, part B.

TUMOR FOCALITY: Multifocal (numerous foci, involving both parts A and B, up to 1.0 cm in greatest dimension).

TUMOR LATERALITY: Bilateral.

TUMOR SIZE: Multiple foci, up to 1.0 cm in greatest dimension.

HISTOLOGIC TYPE: Papillary thyroid carcinoma, follicular variant. *Per TSS, 100% follicular variant.*

MARGINS: Neoplasm is focally present at the inked margin in part B (slide B3).

LYMPHOVASCULAR INVASION: Not identified.

EXTRATHYROIDAL EXTENSION: Not identified.

OTHER FINDINGS: Nodular hyperplasia.

PATHOLOGIC TNM (AJCC Edition): pT1a,m (multifocal), NX.
