Gross Description:

1).The specimen is received fresh, labeled in" left paratracheal lymph node " and consists of a tan pink soft tissue measures 0.3 cm entirely submitted.

Summary of sections:

E- entire specimen

2).The specimen is received fresh, labeled in" total thyroidectomy " and consists of a thyroid weighing 32 grams. The right lobe measures 5.5x3x2 cm , the left lobe measures 5x3x2 cm and the isthmus measures 1x1x0.3 cm. The external surface is covered by a thin fibrous capsule. The posterior surface of the specimen is inked black, and the anterior is inked blue. Sectioning reveals a mass measuring 2.2 cm in greatest dimension in the right lobe. Sections through the remaining tissue reveal red tan and meaty parenchyma. Representative sections of the specimen are submitted for TPS, The remaining tissue is serially sectioned and entirely submitted.

Summary of sections:

N - nodule

RL - right lobe
