Gross Description:

1) The specimen is received fresh for frozen section consultation, labeled "Delphian lymph node" and consists of one tan lymph node measuring 0.6 cm in greatest dimension. Entirely submitted for frozen section.

Summary of sections:
FSC - frozen section control

2) The specimen is received fresh, labeled "total thyroid stitch marks right lobe" and consists of a thyroid weighing 42.5 G. The right lobe measures 7 x 6 x 4 cm, the left lobe measures 3 x 1.5 x 1.0 cm and the isthmus measures 2.0 x 0.5 x 0.3 cm. The external surface is covered by a thin fibrous capsula. The posterior surface of the specimen is inked black, and the anterior is inked blue. Sectioning reveals a large tumor in the right lobe measuring 6.5 x 5.5 x 4.0 cm with fleshy, tan brown cut surface. Sections through the remaining tissue reveal unremarkable thyroid parenchyma. The remaining thyroid parenchyma is red tan and beefy. Representative sections of the specimen are submitted for TPS, and a photograph has been taken.

Summary of sections:
N - nodule
RL - right lobe
LL - left lobe
IS - isthmus
