DIAGNOSIS

1CD-0-3

carcinoma, papillary, thyroid 8260/3

Site: thyroid, nos c73.9

fw
6/17/12

(A) CRICOID THYROID MUSCLE:

Atrophic muscle negative for tumor.

(B) TOTAL THYROIDECTOMY:

PAPILLARY THYROID CARCINOMA WITH FOCAL POORLY DIFFERENTIATED AREAS

Location: Right lobe

Multi-focal: No

Size = 2.4 cm

Extrathyroidal extension: Present, extending into skeletal muscle

Lymphovascular invasion: Present

Resection Margins: Close < 1 mm.

(C) RIGHT PARATHYROID INFERIOR:

Parathyroid tissue present.

(D) LATERAL PARATRACHEAL LYMPH NODE:

METASTATIC PAPILLARY THYROID CARCINOMA IN ONE OF FOUR LYMPH NODES (1/4).

Extranodal extension is not identified.

(E) MEDIAL PARATRACHEAL DISSECTION:

Three lymph nodes, negative for tumor. (0/3).

GROSS DESCRIPTION

(A) CRICOID THYROID MUSCLE - Received is a single fragment of fibromuscular tissue measuring 0.7 x 0.4 x 0.3 cm. Entirely submitted for frozen section in cassette A.

*FS/DX: MUSCLE WITH FOCAL SCARRING AND ATROPHY, NO TUMOR IDENTIFIED.

(B) TOTAL THYROIDECTOMY - An asymmetric total thyroidectomy specimen with right lobe (4.5 x 2.4 x 2.0 cm), isthmus (1.5 x 1.8 x 0.4 cm) and left lobe (3.4 x 2.0 x 0.8 cm).

The right lobe is distended and nodular by a firm white irregular mass (2.0 x 2.4 x 1.8 cm) present in the right upper pole abutting soft tissue without thyroid parenchyma overlying the superior portion. The anterior surface of the right lobe is covered by a skeletal muscle (2.5 x 3.0 cm area). Background colloid nodules are identified within the right lobe, isthmus, and left lobes. No other mass lesions are identified.

SECTION CODE: B1, B2, left lobe of thyroid upper to inferior; B3, left inferior lobe; B4, isthmus; B5-B8, right upper lobe nodule; B9-B10, sections from right inferior lobe.

(C) RIGHT PARATHYROID INFERIOR - Received is a single dark red nodule for frozen section weighing 0.01 gram and measuring 0.3 x 0.2 x 0.1 cm. One touch prep of the nodule is prepared. The entire nodule is submitted for frozen section in cassette C.

*FS/DX: PARATHYROID, WEIGHT 0.01 GRAM.

(D) LATERAL PARATRACHEAL LYMPH NODE – Received are several fragments of fatty tissue measuring in aggregate, 1.5 x 1.0 x 0.5 cm. Entirely submitted in cassette D.

(E) MEDIAL PARATRACHEAL DISSECTION – Received is a single fragment of a fatty tissue measuring 3.0 x 3.0 x 0.8 cm. Dissection reveals two possible lymph nodes ranging from 0.6 up to 0.7 cm in greatest dimension. The lymph nodes and rest of tissue are entirely submitted.

SECTION CODE: E1, one possible lymph node; E2, one sectioned possible lymph node; E3, E4, rest of soft tissue.

CLINICAL HISTORY

Thyroid cancer.
