### Clinical Diagnosis & History:

Thyroid nodule-FNA showed papillary thyroid cancer.

### Specimens Submitted:

1: Thyroid, right thyroid lobe and isthmus; lobectomy

### DIAGNOSIS:

1. Thyroid, right thyroid lobe and isthmus; lobectomy:

Tumor Type:

Papillary carcinoma, tall cell variant

Mitotic Activity:

Not identified

Tumor Necrosis:

Not identified

Other Tumor Features:

Psammoma bodies

Tumor Location:

Right lobe

Tumor Size:

Greatest diameter is 1.4 cm.

Tumor Encapsulation:

None identified

Blood Vessel Invasion:

Not identified

Extrathyroid Extension:

No definite extrathyroidal extension is noted

Surgical Margins:

Free of tumor

Tumor Multicentricity:

Microscopic foci present

One focus of papillary microcarcinoma is noted measuring < 0.1 cm

Non-Neoplastic Thyroid:

Exhibits nodular hyperplasia

Exhibits chronic lymphocytic thyroiditis

Parathyroid Glands:

Not identified

ICD - 0 - 3

Carcinoma, papillary w tall cell variant

**Special Studies:**

| Result | Special Stain | Comment |
|--------|---------------|---------|
|        | RECUT         |         |
|        | RECUT         |         |

**Gross Description:**

1). The specimen is received fresh labeled "right thyroid lobe and isthmus, TPS, fresh and sterile". It consists of an unoriented, 13.5 g thyroid lobe measuring 5.5 x 3.5 x 1.5 cm with a 2.3 x 1 x 0.9 cm portion of isthmus and 3.3 x 1.5 cm, anteriorly attached portion of red-brown, striated muscle tissue. The surface shows a red-purple, intact capsule. The lobe is inked black posterior and blue anterior. Serial sectioning reveals a 1.4 x 0.9 x 0.8 cm ovoid, tan-white, firm nodule which abuts the capsule. The remainder of cut surface is red-tan and meaty. A portion of the specimen is submitted for TPS. Entirely submitted.

**Summary of sections:**

N - nodule  
RL - right lobe  
IS - isthmus

**Summary of Sections:**

**Part 1: Thyroid, right thyroid lobe and isthmus; lobectomy**
