Gross Description:

1. The specimen is received fresh, labeled "total thyroidectomy" and consists of a total thyroidectomy, measuring as follows: right lobe 5.0 x 2.9 x 0.6 cm; the left lobe 4.6 x 2.3 x 0.7 cm and the isthmus 1.0 x 0.3 x 1.3cm. The external surface is covered by a thin fibrous capsule. The posterior surface of the specimen is inked black, and the anterior is inked blue. Sectioning reveals a single nodule in the left lobe of the thyroid, in the upper pole, 0.7 x 0.8 x 0.6cm, with a white-yellow firm cut surface. Sections through the remaining tissue reveal red tan and beefy parenchyma. TPS is submitted. The entire thyroid is submitted.

Summary of sections:
N - Left thyroid, upper lobe, nodule, entirely submitted
RL - right lobe, remainder
LL - left lobe, remainder

IS – isthmus
